

Club Sanitation Products

Petra Health "E" Wipes are an FDA registered disinfectant wipe that is effective in killing viruses, bacteria, fungi and algae. The active ingredient in Health "E" Wipes not only works to kill germs on hard surfaces as well as on skin, but continues its antibacterial activity as time goes on.

Sustainable Earth #66 is an EPA approved disinfectant spray and a surface sanitizer designed specifically for hospitals, restaurants, bars and other institutions where controlling the hazard of cross-contamination is of prime importance. Containing the main ingredient recommended by the EPA to protect against SARS-CoV-2, SE66 effectively sanitizes environmental surfaces, utensils and equipment and is an effective bactericide and virucide; it prevents and controls mold and mildew and the odors they cause on hard, nonporous, inanimate surfaces.

MonoFoil M is an EPA-approved, antimicrobial nanotechnology that is effective in killing 70+ strains of viruses, bacteria, mold, fungi and algae. When applied, MonoFoil creates a long-lasting protective anti-bacterial shield that prevents new microbial contamination for over 30 days. It is non-toxic and can be applied to various surfaces such as door handles, fitness equipment, floors, handrails, indoor play sets, sports equipment, keyboards, kiosks/exhibits, toilets, sinks, showers and more. Used in hospitals, sports arenas, and schools MonoFoil provides protection unlike anything currently on the market.
